Rocketry

The Rocketry course gives campers an opportunity to explore the world of model rocketry. Each day, campers will build, paint, decorate and launch a new rocket (five in all). They will get to take these rockets home, and... **with adult supervision**, launch them on their own.

Each day will begin with the assembly of a new rocket kit. Most of these are easy to assemble and relatively durable. Once the kits have been assembled and the glue has dried, campers may take their new rocket outside and spray paint it any color they wish. Later, we will launch our rockets at the park. These rockets will travel as high as 2,000 feet into the air and then, using a small parachute, float softly back down to Earth. Once recovered, the rocket can be loaded with a new engine and launched again, and again, and again.

A few important items to remember to bring:

- Swimsuit
- Towel
- A **nut-free**, kosher-style lunch (no mixing of meat and dairy)
